About Me

Results-driven Software Engineer with 7+ years of experience in; building mobile applications, backend systems, and IoT solutions. Specialised in delivering scalable, high-performance applications with clean architecture and modern development practices. Experienced in leading projects from idea to deployment, integrating backend services with mobile platforms, and ensuring seamless user experiences. Familiar with agile workflows, simple project planning, and team collaboration

Skills

Mobile Development: Cross-platform app development (Flutter), Android/iOS deployment, App Store Google Play publishing

Backend Development: REST API design, database integration (SQL & NoSQL), authentication etc.

Web Development: MVC frameworks, API-driven web platforms, responsive UI/UX

Software Architecture: SOLID principles, MVVM, MVC, DDD Design, Clean Architecture, Scalable System Design

DevOps & Tools: Git/GitHub, CI/CD pipelines, Docker, cloud deployment (Firebase, Azure)

IoT & Hardware: Arduino, Raspberry Pi, sensor integration, hardware-software interaction

Professional Experience

Turbim Technology

Mobile Application Developer

2022 May – 2023 Jun

- Designed and developed an ERP-integrated E-Commerce app using Flutter & REST API, published on Google Play Store and App Store.
- Built a logistics tool for carriers to track orders with real-time updates.
- Developed a handheld terminal application integrated with MSSQL for ERP systems.
- Worked on mobile versions of Golden ERP, ensuring seamless backend communication.

SolStage Yazılım ve Limited A.Ş

Backend Developer

Present

- Designed the overall architecture of **Garga**, a mobile application focused on modern food & market delivery app.
- Developed the backend services using **.NET**, ensuring scalability, performance, and security.
- Contributed the back-office system with **MVC architecture**, enabling efficient content and user management.
- Collaborated closely with frontend and mobile teams to deliver a seamless integration between backend services and mobile clients.

Events

Flutter Fest Hackathon: Contributed to a mobile app project for the competition. Led backend development with Python & REST API, collaborated on Flutter-based mobile frontend.

Hasan Kalyoncu University – GameJam: Developed a game using Unity & C#, achieving 2nd place in the competition. Managed the team, including task delegation and coding under tight deadlines.

Education

Hasan Kalyoncu University

Bachelor in Computer Engineering

Gaziantep

2020 – Present

Technical University of Ostrava

Bachelor in Computer Science

Czech Republic

2023 – 2024

Languages

Turkish: Native Speaker

English: Fluent
